ABOUT LIFT

LIFT LIFESTYLE has been involved in outdoor furniture / lifestyle products development and sourcing services since 2003 with our head office based in Hong Kong. We provide a variety of modern outdoor lifestyle products and related services for clients in Europe, North America, Australia and throughout the world. We also have extensive experience in serving the hospitality industry in Asia.

At LIFT, we are highly experienced in handling export orders worldwide and assisting our clients with project work from small balconies to outdoor areas of international hotels.

After 11 years of development, LIFT continues to offer you an extensive collection of outdoor furniture, conceived by innovative designs and made by skilled craftsmen to the highest standards. Combining the pleasures of comfort without sacrificing practicality and offering custom-made services for designs and sizes in a style that reflects your unique sense of style and needs.

The materials we use at LIFT, like the designs we employ, are both classic and contemporary. We continue to break design boundaries in the use of any different fine materials including glass, stainless steels, all weather weave, textile, fabric, HPL, and plastic. Our designs surpass the criteria for furniture destined for outdoors.

Being a forward and dynamic company, our drive is excellence in design, attention to details in manufacturing and service, consistency in every aspect of product design. That's how our reputation is built – QUALITY & RELIABILITY.

At LIFT, we offer advice, service and specialised delivery of truly inspirational furniture and equipment for outdoor living.

This catalogue is an introduction to our product lines and features just some of the outdoor furniture / equipments we have. We hope you enjoy seeing our work as much as we enjoyed producing it. **Life Is Freaking Terrific!**

MATERIALS

The materials used in the manufacture of Lift Lifestyle collections are carefully selected to meet the highest quality standards producing high utility furniture for all weather use.

• **Ease to Maintain** • **UV resistant** • **Mould resistant** • **Water resistant** • **Cold resistant** • **Flexible & comfortable**

We are proud of our traditions but continue to break design boundaries with the innovative use of 304 grade Stainless Steel, the industry standard for outdoor products. We use stainless steel fittings to give you reliability as well as comfort and style and use stainless steel widely across our contemporary designs. We also value high-grade Aluminum for its strength, low weight and its resistance to corrosion and have incorporated it in a number of our collections.

Our extensive All Weather Weaving fiber is a synthetic, highly flexible, tensile strength polyethylene. It is made of HPDE, a 100% recyclable, non-toxic and highly durable material which are natural to the touch, tear resistant, UV resistant, weather resistant and extremely durable. We also offer **VIRO**® and **REHAU**® in a wide choice of colours, treated in an extrusion process which creates a synthetic fibre completely coloured throughout.

We continue to incorporate **BATYLINE**®, a polyester fibre which is PVC coated and then woven to create an exceptional fabric – the perfect material for seats and loungers. **BATYLINE**® is the creator and manufacturer of composite fabrics for interior and exterior furniture. Through the Précontraint® Ferrari® technology, the fabrics provides unparalleled dimensional stability and tear resistance. **BATYLINE**® also makes all the difference when it comes to resistance to UV radiation, resistance to mould, and exceptional robustness. Furniture covered with **BATYLINE**® dries quickly, remains cool even under the hot sun, and combines comfort, aesthetic appeal and trouble-free care.

Totally outdoor, we have looked into the tiniest details – **Quick Dry form**®, **YKK**® zippers, **Gore Tenara**® threads, that we are able to offer the best warranties in the industry. **Quick Dry form**® is produced with a special process called "Hydro-blast Reticulation". Unlike Non-reticulated normal foam, Reticulation Foam has large open pores, which permit maximum water drainage and air circulation, hence allowing for quick drying and usage even after being soaked. **Quick Dry form**® is also treated with UREGARD for anti-microbial protection. It prohibits the growth of common moulds and fungus inside the cushion, even when left outside for an extended period of time.

We provide comfortable plush and soft cushions in colours that is as specific as it can get. Brilliant colours for umbrella covers, cushions, pillows, beanbags and sofas with colourful and unparalleled outdoor performance of **Sunbrella**® fabrics. **Sunbrella**® has been the leader in performance fabrics. **Sunbrella**® fabrics are water repellent, stain resistant, and fade resistant even over an extended period of time. **Sunbrella**® fabric is created by a unique process that adds colored pigments during fiber production. The color is locked into the fiber and lasts as long as the fabric does, resisting fading from UV rays, chlorine, salt water and washing, yet are easy to clean with mild soapy water. The quality of **Sunbrella**® fabrics ensures you will enjoy it for a long time, as they are designed not only to look good, but also to withstand the elements of life.

We put a great deal of work into our furniture so that only the minimum of maintenance is required by you. However a little regular TLC will ensure your furniture still looks good even after many years of outdoor use.

HATTON Sun Lounger Collection

Topalit has been manufacturing high-quality and longlasting tabletops for 40 years.

Heat-resistant and rugged, they defy the weather; break-proof and shock-resistant, they show their strong side when things get tough. Our tabletops remain loyal and quiet companions for many years.

Choose from our wide range of different decors, motifs and shapes. From classic to modern, single or multi-coloured, with or without advertising message, individually customised to your requirements.

Or simply design your dream tabletop yourself! It is our stated goal to continue optimising our proven product in the spirit of research and with a focus on ongoing improvement. The highest level of aesthetics and aspiration - that is our intention and objective.

In doing so, we pay full attention to protecting the environment. Our tabletops are manufactured exclusively from Austrian timber, which is grown in sustainable forests and can be disposed of in household waste. Browse through the world of Topalit on the pages that follow and familiarise yourself with the special advantages of our products, which have been tried and tested in 45 countries for many decades.

Caravita Patio Umbrella

BIG BEN Parasol Collection

BIG BEN is the ultimate in protective shade with its heavy duty frame and expansive canopy. Offering spacious coverage for multiple table setting and several seating groupings, the BIG BEN is the perfect resort or restaurant shade solution. With a diameter width expanding up to 6m (19'8") the BIG BEN becomes a fixture in any setting.

Easy installation with special alignment guide

Special Alignment guide makes installing large shades a breeze. Set center crews as your supporting guide on either the mobile base or ground anchor. Using the alignment guide, position on the set screw, and raise the umbrella. Secure shade flange with additional screws, and it's ready to use.

Telescopic aluminum mast

Rust free aluminum lifting spindle

Gear box enclosed in mast

Removable stainless steel crank handle

Connecting bracket securely joints main struts to supporting struts.

Supporting struts measure 40x20x2mm with internal aluminum reinforcement 35x15x2mm.

Canopies fit perfect any time because of telescopic strut endings.

Pratic Pergola, offer outstanding protection from the sun, wind, rain and cold.

This sophisticated Italian made pergola has a flat SUN and WATERPROOF roof which turns your terrace into a useable outdoor space.

With an easy remote controlled operating system and silent working of the blades you can continue your plans for relaxing or entertaining outdoors whether you need shelter from rain or shade from the heat of the midday sun. Choose the wind and rain sensor option for total peace of mind.

When closed, the blades form a waterproof roof in normal showers. A gutter system drains the rainwater away towards the columns. These patented blades are designed in such a way that the water is drained off to the sides, even if the blades are opened up immediately after a rain shower.

The sides can be fitted with a range of optional moveable wall elements; glass sliding doors, cedar sliding panels and many other features all tailored to your space. Choose from any RAL to blend into your home and garden.

Add lighting, heating and a speaker system for total luxury.

WHY PRATIC?

- Eco-friendly, reduce the overheating of the building and of the glass walls protected by the bioclimatic pergolas
- Natural light and shade comfort: the 140° rotation opening of wings ensures the light and shade magnitude you look for according to sun orientation
- Design: clean and sleek design structures, excellent for any architectural context
- Pratic's quality: Made in Italy designing and manufacturing, strictly complying with the regulations and characteristics required for an outdoor product
- Adaptability: perfect both for public and commercial spaces
- Remote Control: up to 42 functions for an easy control of wings, LEDs and RASO integrated closures
- Uniqueness and Safety: Opera, Vision and Raso have been totally designed by Pratic. 5 patents have been registered in order to guarantee the uniqueness of the product.

Misting Fan - Unique Italian design misting cooling fan

The freshness of spring

The elegant geometry of the rattan covers the curvy body of this modern totem. A wellness oasis for tribes of all ages.
